

IF YOU TEST POSITIVE

Isolate/stay home for 5 days

(Day Zero is when you test positive or have symptoms, whichever is first)

Do you have symptoms on day 5?

NO

- Come out of isolation on day 6

YES

- Continue to isolate until symptoms resolve (consult with Health & Wellness if unsure)
- Wear a mask for 5 days after isolation

PLEASE NOTE:

- Individuals who have tested positive during the last 90 days should not be retested unless there are concerns about new infections.
- Due to the difficulties of strictly masking in a shared room, if a roommate tests positive, they must follow the flow chart above, but in addition, must also have 2 negative antigen tests (24 hours apart) before they can return to their shared room.
- All policies are subject to change as the COVID situation evolves or based on individual circumstances. If you have any questions or concerns not addressed by this chart, please contact Health and Wellness Services.
